## **Development of a 230-250MW independent power project. Closing date: 30 June 2009**

Development of a 230-250MW independent power project in Al-Nasserieh.

The project comprises a flexible reciprocating engine power plant with a number of multiple units installed in a row and will be of a minimum 12 and a maximum 50 units (generating sets) of identical capacity.

The power plant, with a total installed capacity 230-250MW, will be operated on dual fuel (HFO/gas).

The project will be let on a build-own-operate or a build-operate-transfer basis, and with a 20-25-year investment period.

The issue of request for proposal documents is expected on 6 July;

the last date of receipt of bids is 17 August;

the bid opening will be 18 August; and the notification of the preferred bidder will be 27 September.

Request for qualification.

Tender no 266/2009.

Details, available until 18 June, on payment of £Syr50,000 or €800 from Public Establishment of Electricity for Generation & Transmission, Engineer Hisham Mashfejj, Director-General, Contracts Department, PO Box 3386, Damascus, telephone (96311) 2119040, fax (96311) 2229062, email [dg@peegt.gov.sy](mailto:dg@peegt.gov.sy), website [www.peegt.gov.sy](http://www.peegt.gov.sy).
